

Project Title: Carton House, Dublin

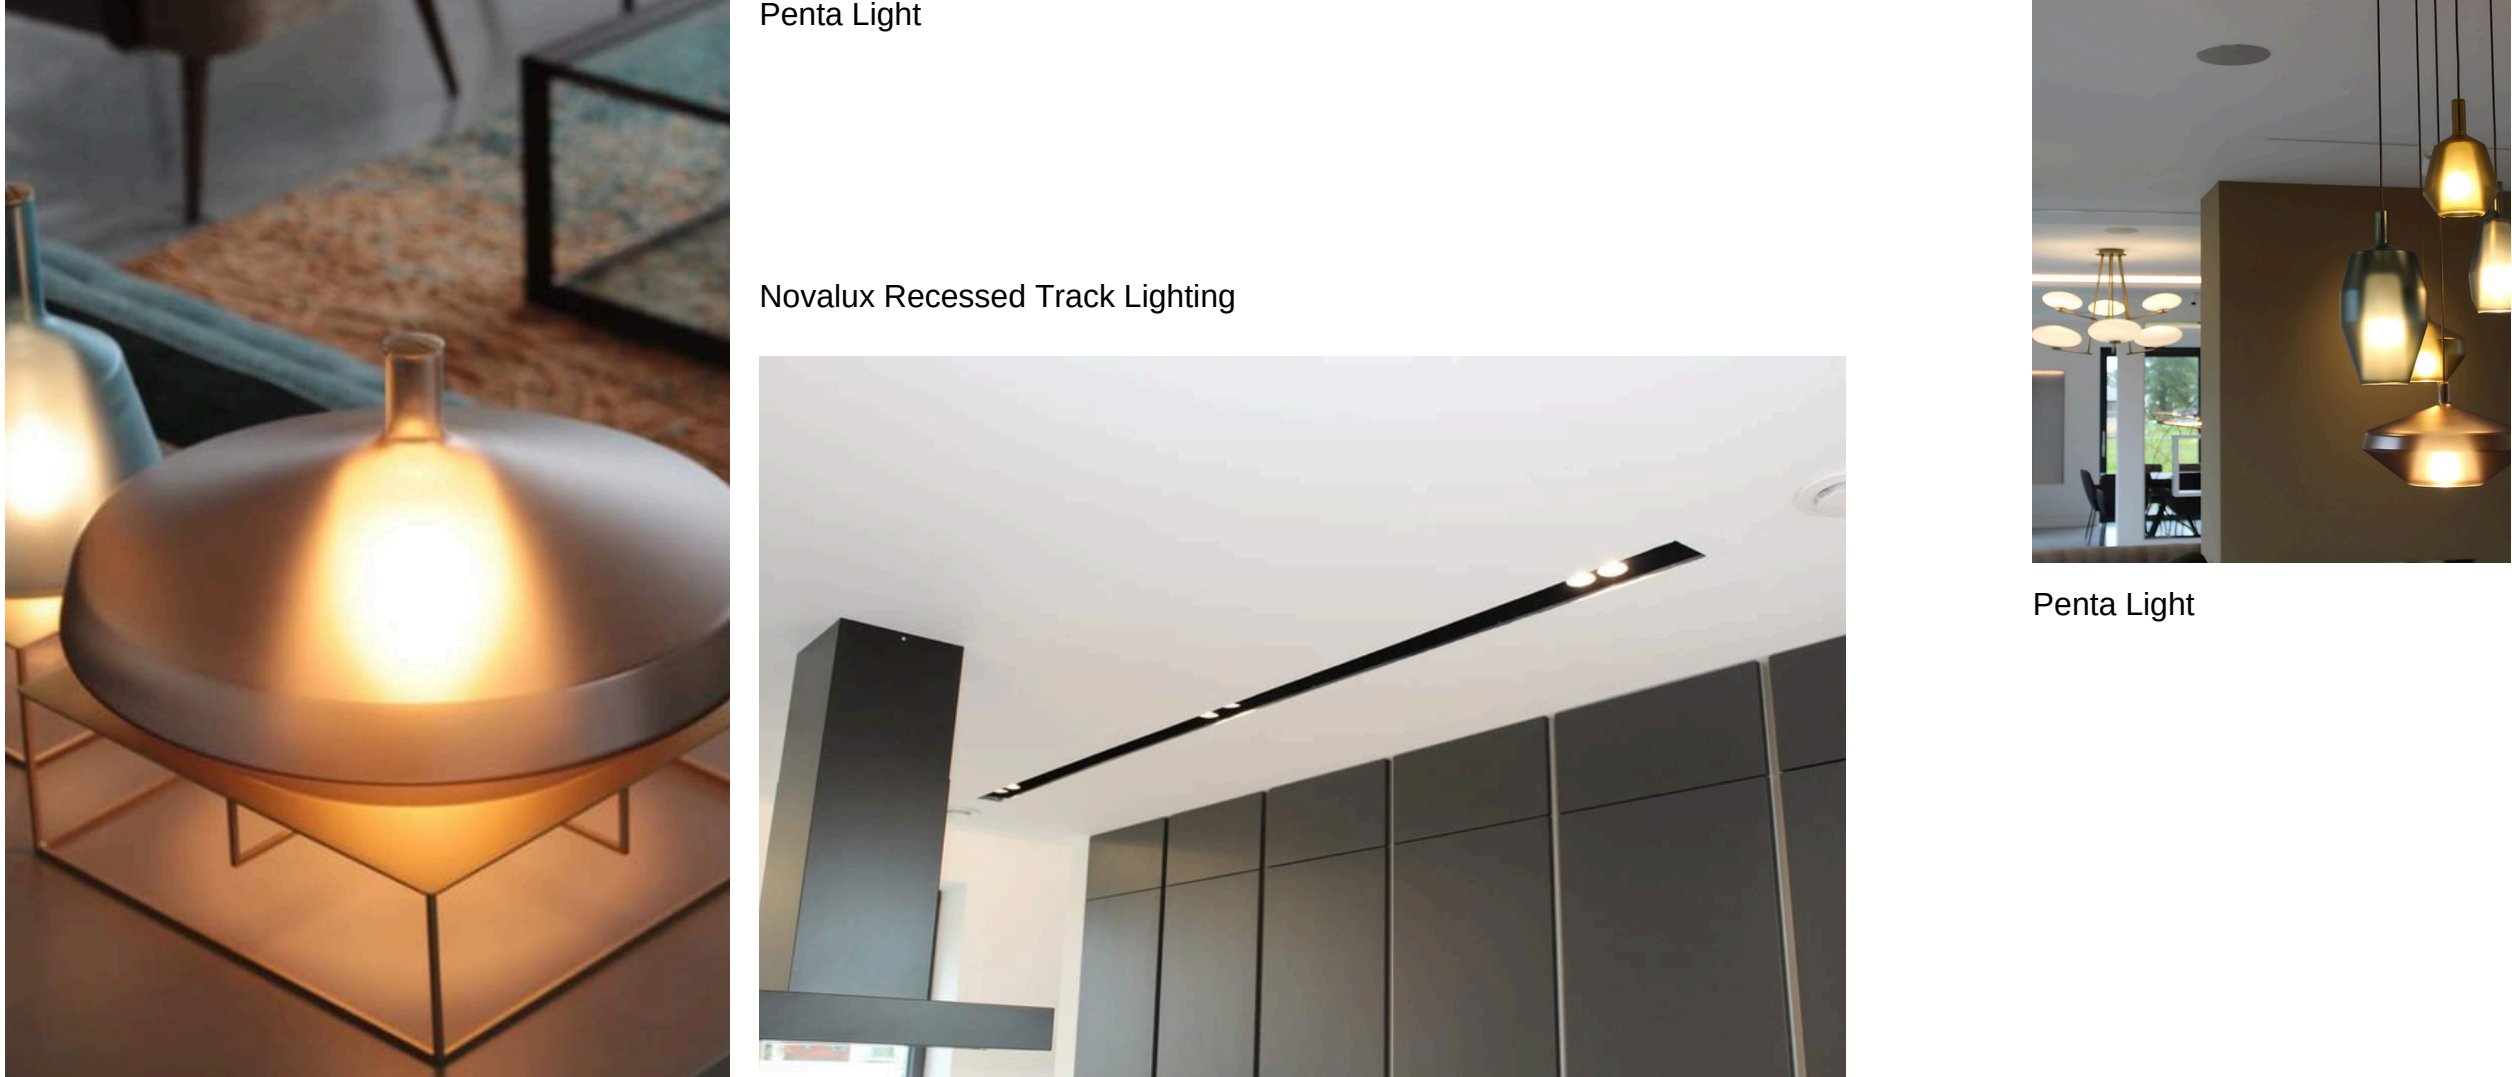

001

We were delighted to be part of the team for this stunning modern new build in Dublin, delivering a full lighting design, detailed lighting specification, and 3D visuals for the client. Their vision was an elegant, contemporary aesthetic that complemented their carefully selected furnishings and beautifully designed home. Lightplan Dublin supplied all LED strip lighting, playing a key role in the lighting design that elevated this home beyond the ordinary. The breathtaking Penta Light 'Glo' pendants create a striking focal point, suspended from the double-height ceiling in the hallway. A bespoke harness was designed for the LED strip lighting on the floating staircase, enhancing its architectural elegance. This exceptional home reflects the client's impeccable taste and deep understanding of interiors, featuring premium Italian and Spanish lighting brands such as Antonangeli, Penta Light, Le Klint, and Foscarini. It was a pleasure to contribute to this remarkable project.

Project: Contemporary Build, Howth, Dublin

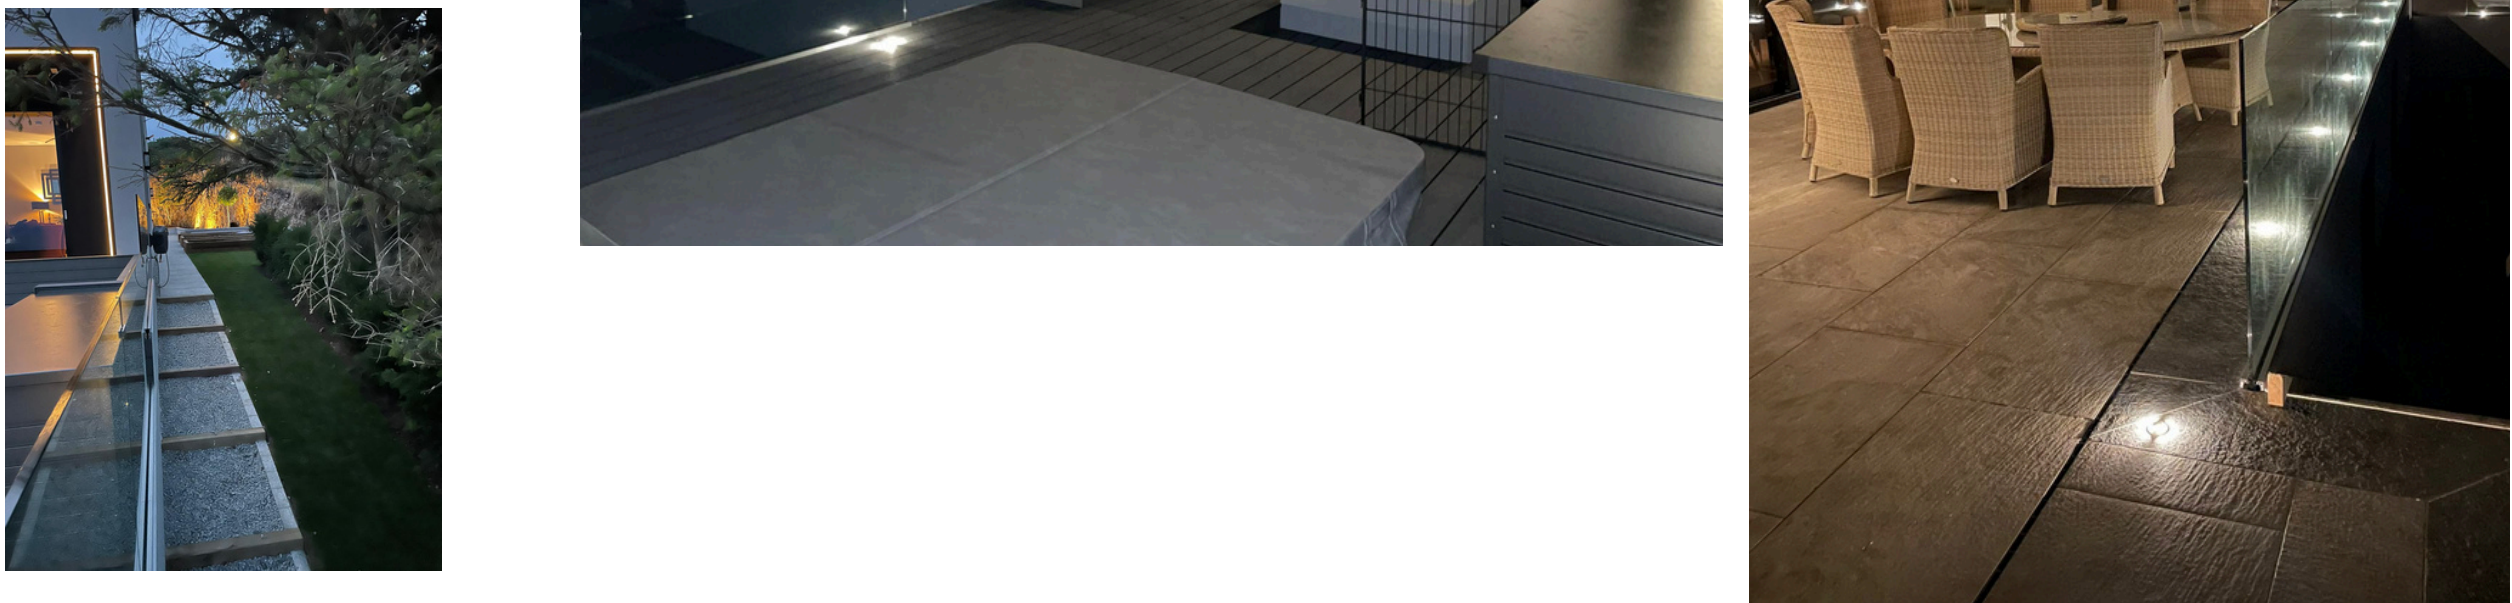

003

Contemporary New Build, Howth, Dublin

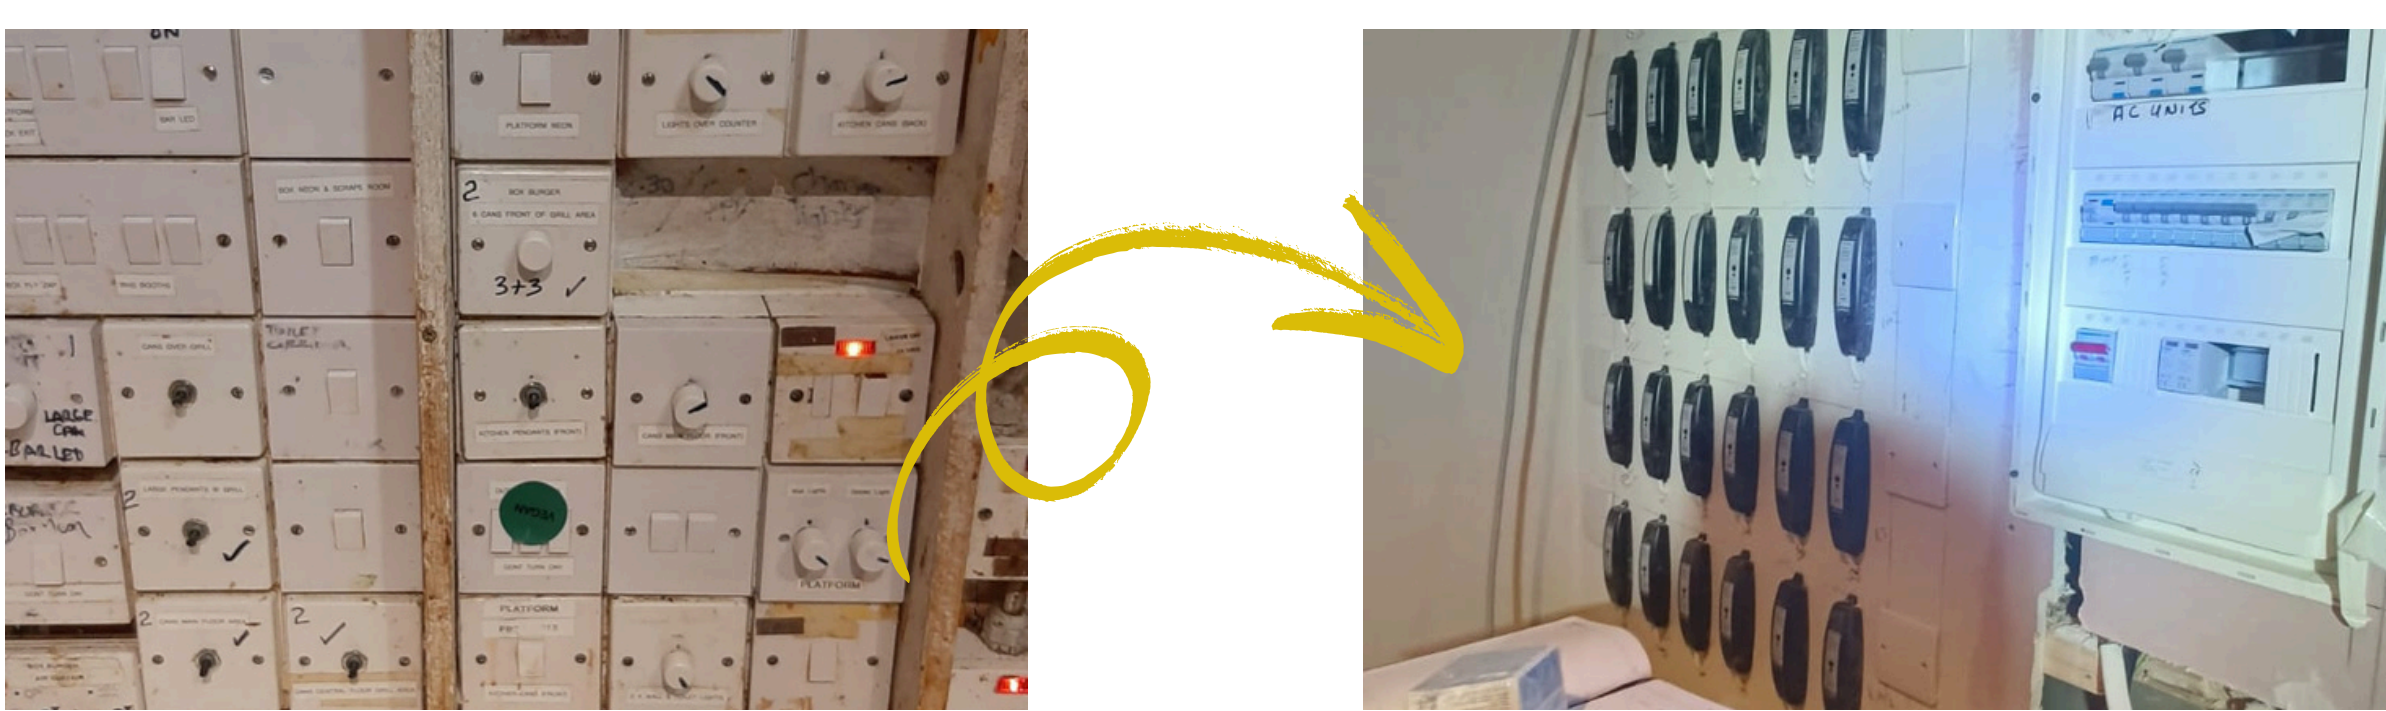

004

Shots from recent project in Howth, Co. Dublin. Featuring lighting from Penta Light, Novalux, LEDs4 and Astro Lighting.

Before and After with Lutron Lighting Controls - Platform Pizza, Bray

005

Old fuse board
The old fuse board needed to be replaced with something that could be easily accessed and worked more efficiently.

New Lutron Lighting Controls
Lutron lighting controls help businesses save energy, reduce costs, and enhance productivity with smart, automated lighting solutions. Features like dimming, occupancy sensors, and daylight harvesting optimise energy use, while tunable lighting improves employee comfort. Businesses can automate schedules, control lighting remotely, and create customised scenes for different needs. Lutron systems integrate with building management for seamless operation and help meet sustainability goals.

Heuston Train Station, Dublin
Colourful display of lighting from Lutron Lighting Controls. The colour settings can be changed by Irish Rail e.g. green for St. Patricks or red for Christmas!
